

**Subject:** Data Analyst Intern – Assignment Submission

Dear ClassMent Team,

Thank you for the opportunity to move forward in the hiring process. I have explored Roadmap and reviewed the recently launched tool. Below are my thoughts:

**What Stands Out:**

I think the idea behind the “roadmap” is what stands out, because everyone needs the assistance for deciding the road to achieve any role.

The UI is also user friendly and very responsive. It is very easy to use and also gives professional vibes.

**Areas for Improvement:**

I want to suggest one improvement to this, that is instead of giving options to choose give users freedom to type. Like give it Chat like experience. Because it will give more user-friendly experience. And it will give AI like experience.

And second improvement I see is making this service login free. Means users can use this service without login.

**How I Would Approach It Differently:**

I will achieve chat like experience by providing chat UI to users and also for better inputs I will provide question and answer like chats to the user.

Also user can chat freely using their own customised chats. And I will provide best match of roadmap based on their input.

For better inputs by users I will integrate template suggestions for ease of user to format their chats and inputs.

Additionally, I have completed the assigned task, which is attached to this email. Please let me know if you need any further details.

Looking forward to your feedback!

Best regards,  
Shubham Balasaheb Rampurkar
